MATERNAL HEALTH AND CARE: A RESEARCH BIBLIOGRAPHY

by

Prakash C. Sharma, Ph.D.
Department of Sociology
University of North Alabama
Florence, Alabama

PREFACE

The present bibliography contains nearly 150 selected references on studies in maternal health and care published chiefly during 1940-1970. The references listed in the bibliography are by no means definitive nor are they meant to be, but they represent many of the old and current publications which may be used as guides for further research.

The bibliography is divided into two parts. Part one contains the listing of books and monographs and Part two is a listing of articles and periodicals. The references are arranged by the author in alphabetical order when possible.

I would like to thank Mrs. Mary Vance, Editor, Council of Planning Librarians, for her encouragement and assistance in the completion of the bibliography.

It is my hope that those engaged in various research aspects of maternal health and care will find this reference material a useful and informative instrument.
